

## PLAN TEST

The PLAN test is valuable for all 10th-grade students, the PLAN test measures academic progress in high school. It is designed to improve students' preparation for education, training, and work after high school while they still have time to adjust their high school courses. The PLAN has content similar to the ACT test.

### Why should my kid take the PLAN?

Taking the PLAN is a great way to prepare for the ACT. In fact, students who take the PLAN tend to score higher on the ACT than students who do not take the PLAN.

It covers the same subjects—English, mathematics, reading, and science—and provides an estimated ACT score. The PLAN points out academic strengths and areas where improvement is needed and lets students know if they're on track for college.

The PLAN helps them find careers that match their interests and even helps connect them with colleges interested in them.

### What subjects does the PLAN test cover and how long does it take?

The PLAN includes four multiple-choice tests covering English, mathematics, reading, and science.

Subject	Number of Questions	How Long It Takes
English	50	30 minutes
Math	40	40 minutes
Reading	25	20 minutes
Science	30	25 minutes

The PLAN also includes a 72-item interest inventory that asks questions about the types of work tasks students would or would not like to do.

**The 2012 PLAN will cost \$12.00 and signups will be in the Guidance Office.**
