

# VIDEO

## Music Video Assignment

### Activity Preparation and Assignment

Using video/pictures for the visual, 2 to 4 audio files, and special effects, create a music video that will tell a story or sell a product. The production should be at least 60 seconds but not more than 90 seconds long. Create a project folder entitled [*insert your name*] *music video* to hold images, audio, video, and other project files.

Produce a music video using the following directions:

1. Determine a theme for the music video, key it, and have the theme approved by the instructor. (See Instructor's Approval Form.)
2. Gather *only* the content for the project:
  - a. Video recorded on a video camera
  - b. Pictures (Scan at 150 ppi resolution; save as TIFF files.)
  - c. Name video clips and other digital images with recognizable, easy-to-remember names and the order in which they will be used
  - d. Audio files.
3. Use 2 to 4 audio files to create the audio layer for your music video sequence.
4. Use appropriate fade techniques for audio files.
5. Once the audio track is put together the way you like it, place your video, pictures, and/or images over the appropriate audio.
6. Use different transition effects between each image/picture.
7. Save as a movie file and export the file to the project folder.
8. Copy the movie file to a CD, or other medium, as directed by instructor.
9. Submit a print screen of the files in the project folder in Details view and a print screen of your timeline from the video software.
