Import sound files. D2	1.4, 1.8	Determine a theme for a story or product and produce a music video with video and other images using video editing software. Use music, audio, and sound files as the background for the images/video. Your final product should be at least 60 seconds but not longer than 90 seconds and include 2 to 4 audio files and 2 to 4 video/image clips. Use copyright guidelines in the production of your music video. Edit sound files and video clips for the final product. Proofread and correct the text credit information. Copy the files to another medium as directed by the instructor.	Use the <i>Music Video</i> assessment to evaluate the video clips and images captured and the effective manipulation of these files; the sound and audio quality; the length of the production; and file management. Assess the text credit information for correction of errors and typos. Evaluate the transfer of files to a CD or some other medium as directed by the instructor. Also evaluate the overall video and audio production for the story line or theme as being representative of the written plan to sell a product or tell a story.
