## Other Kinds of Payments

**Example:** Maria parks cars for a valet service. She earns \$8.25 per hour. One week she worked 26 hours and received \$119.00 in tips. What was her total income for the week?

\$ 8.25	Hourly rate	\$214.50	Hourly wages
<u>X 26</u>	Hours worked	<u>+119.00</u>	Tips
\$214.50	Hourly wages	\$333.50	Total income

Maria's total income for the week was \$333.50.

**Directions:** Find the total income.

	Hours Worked	Hourly Rate	Tips Received	Total Income
1	36	\$7.50	\$123.00	
2	27	\$5.95	\$87.00	
3	18	\$9.30	\$162.25	
4	45	\$8.10	\$138.50	

**Directions:** Find the weekly totals and the wages for each employee.

	Employee	Daily Productions					Weekly Total	Piecework Rate	Wages
		M	T	W	Th	F			
5	Ted	31	29	30	26	35		\$3.06	
6	Alicia	5	6	8	9	4		\$11.45	
7	Larry	12	8	15	11	10		\$6.41	
8	Oscar	41	32	35	28	36		\$2.88	

**Directions:** Solve.

9. Sonia clears and sets tables. She earns \$6.80 per hour plus 10% of the waiters' tips. If the waiters make \$274 in tips during her 8-hour shift, how much does Sonia earn?

\_\_\_\_\_

10. Jason assembles oxygen masks. He earns \$11.45 per hour plus \$.03 per mask. One day her worked 7 hours and made 2,368 masks. How much did Jason earn?
