## Important Message about FTC's Technology Programs and Embedded Credit

Students accepted into a FTC "Technology Program" need to be informed about the embedded Math and English (Communication Arts) credits which are part of the program requirements.

The Math and English embedded credits are earned in conjunction with the Technology Program and will be called Technical Math and Applied Communication Arts. Students are enrolled in Technical Math and Applied Communication Arts by virtue of being in a Technology Program at FTC. Again it is part of the tech program; participation in embedded work assignments is not an option.

A student may earn ½ unit of credit for Technical Math and Applied Communication Arts each year he/she is enrolled in the Technology Program. Upon completion of a two-year tech program the student may earn a full credit for both the Technical Math and Applied Communication Arts. The letter grades earned will be reflected on a grade report and transcript.

Partial credit in Technical Math or Applied Communication Arts will not be given if the student is dismissed from or drops from the Technology Program. If a student transfers out of the district, a transfer grade for the Technology Program and the Technical Math and Applied Communication Arts will be provided.

A student may participate in the FTC Technology Internship Program during their final semester if all internship criteria is met, including program competencies and embedded credit competencies at the 80% mastery level.

I have read and understand the requirements for the Technology Programs and the embedded credit program at FTC.

\_\_\_\_\_ Yes, I will do all the assignments for the embedded credit and I want it on my transcript.

\_\_\_\_\_ Yes, I will do all the assignments for the embedded credit; however I **do not** want it on my transcript.

Signed
