Partnering with Peers

Your Group	Topic
<u>1st Round</u> : Same #s together	Personal & Social Development
<u>2nd Round</u> : Odd #s & Even #s (1 & 3, 2 & 4)	Academic Development
<u>3rd Round</u> : 1 & 2 3 & 4	Career Development
<u>4th Round</u> : Whole Group	Transitioning into MS

A close-up photograph of a white analog clock face. The clock has black numerals and tick marks. A red triangle is pointing to the 30-minute mark. The text "4 Sessions" is overlaid on the clock face.

4 Sessions

30 minutes each

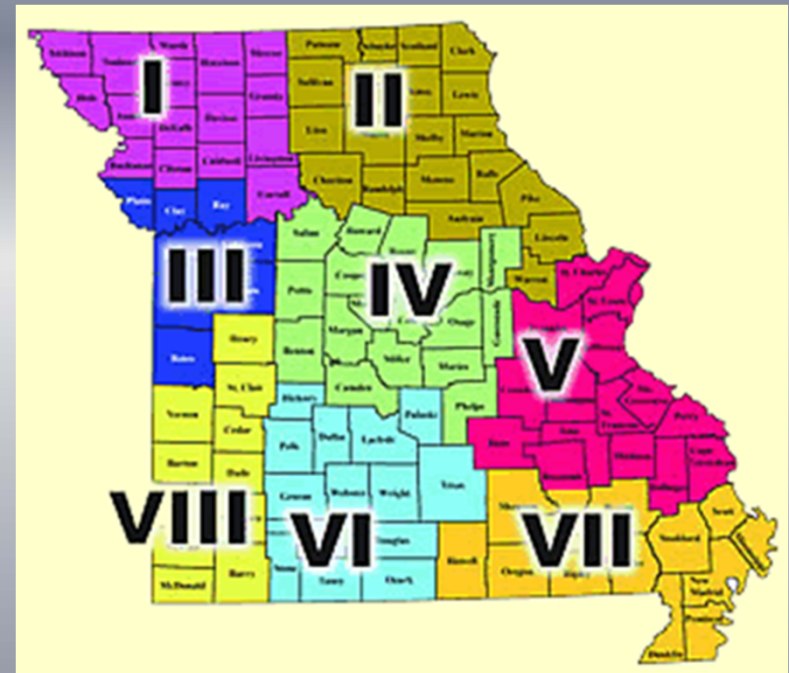

A scenic photograph of a forest path. The path is covered in fallen leaves and leads through a dense forest. On the left, there are trees with vibrant autumn foliage in shades of orange, yellow, and red. On the right, there are tall, dark evergreen trees. Sunlight filters through the canopy, creating a soft, hazy atmosphere. The overall mood is peaceful and natural.

DREAM CAREER QUIZ
What part of the working world best suits you?

Dream Career Quiz

This isn't Jeopardy. There are 20 questions and you can't get a single one wrong. Plus, it's fun (not summer vacation in Vegas kind of fun, but still...). In the end, we'll tell you what types of careers you'll probably be happiest in. And really, isn't that what you're here for?

Simply give us an honest answer to the questions below, and we'll give you an idea about where your passion might lie. It's not the end-all be-all answer to your prayers, but it's a really good place to find some of the best careers around.

Ready? Here we go.

Question 1

If you could be the most famous person on earth, would you?

Yes-how awesome would that be

No-too many psycho fans annoying me.

Question 2

When you have work to do, you'd rather:

Do it by myself. It's easier that way.

CAREER CONNECTION

Career Family Tree Worksheet

Take a look at the careers chosen by your grandparents, parents, aunts, uncles, and other relatives.

It's fun to think about how family members' career choices have influenced their lives—and it may help you identify things you want and don't want in a career. Fill in each box with the career of the listed person. Add boxes for more aunts, uncles, cousins, brothers, and sisters if you can.

Are there career areas that several of your relatives have pursued? If so, list them here.

How have your family members' career choices changed over time?

What do your relatives tell you about reasons to choose or not choose careers like theirs?

LOOK TO THE FUTURE: CAREERS IN SPACE

Since you were little, you have probably associated space careers with astronauts, walking on the moon, Neil Armstrong, and space shuttles. Those certainly make a lasting impression, but you should probably know two things, if nothing else: first, not every space career involves hopping around in a big spacesuit, and second, *there are lots of opportunities available for exciting space careers today*. The following list of possible careers in the aerospace field is by no means exhaustive, but it gives an idea of the wide variety of things you can do and still be related to space. Take a look. It might change your life.

Navigation 101 Curriculum: Lesson Plans for Grades 6–12

The Washington State Navigation 101 Curriculum includes 20 lesson plans for each grade level from grades 6 through 12, along with a Resource Guide for lead advisors or building coordinators for each grade. These lesson plans are meant to be used as templates to give your school a foundation on which to develop a customized Navigation 101 program. Please feel free to adapt these lesson plans to make them consistent with your school's customs, traditions and expectations.

These lesson plans are meant to be used as templates to give your school a foundation on which to develop a customized Navigation 101 program. Please feel free to adapt these lesson plans to make them consistent with your school's customs, traditions and expectations.

Download/print the lessons for your grade level:

Sparking the Future Curriculum: Lesson Plans for Grades 7–12

The "Sparking the Future" curriculum was designed for students who are the first in their family to attend college. These lessons provide extra help for students in grades 7 through 12. Students follow a guided tour through postsecondary options, helping them explore college and career options. "Sparking the Future" lessons were funded by a grant from the [College Spark Foundation](#) and designed by teams from Ft. Vancouver High School and Mt. Vernon High School.

<http://www.successlink.org/>

The screenshot shows the homepage of the SuccessLink website. At the top left is the SuccessLink logo, which features the word "SUCCESSLINK" in a blue, serif font with a yellow starburst graphic behind the "S". To the right of the logo is the date "Monday, October 31, 2011". Further right is the Missouri Department of Elementary & Secondary Education logo, which includes a torch icon and the text "Missouri DEPARTMENT OF ELEMENTARY & SECONDARY EDUCATION". Below the date and logo are navigation links: "Home", "Contact us", and "Site map". On the left side, there is a vertical menu with five items, each preceded by a blue right-pointing triangle: "About SuccessLink", "Lessons / Units", "Content Areas", "Proven Practices", and "Jobs / Careers". The main content area features a large image of three women sitting outdoors, looking at a laptop. Overlaid on this image is a black box with white text that reads: "Linking Educational Innovators Across Missouri. SuccessLink positively impacts educators by identifying and disseminating Best Practices". Below this image is a horizontal bar with three colored segments: orange, green, and blue. Each segment contains white text: "CURRICULUM" in the orange segment, "TECHNOLOGY" in the green segment, and "MO TEACHING JOBS" in the blue segment.

The background of the slide features a light gray gradient with a pattern of thin, vertical, dark blue lines of varying thicknesses and orientations, creating a textured, web-like appearance. A solid dark blue horizontal band is positioned in the lower third of the slide, containing the title text. Below this band is a thin, dark blue horizontal line, and the bottom of the slide is a solid light gray gradient.

18 Ways to Warm Up a Chilly Climate

In the current environment of global competitiveness, and an increasingly diverse population, we cannot afford to have individuals in any segment of the population consider themselves not eligible for any career field because of their race/ethnicity, gender, disability or other characteristics. Teachers need to have a set of skills that is as diverse as the students they are working with. It is a challenge to reach all the students in their classroom; but there are some simple tips to help ensure that teachers are engaging everyone. This module contains a presentation and materials to give teachers ways to include all students in their classroom.

The screenshot shows the homepage of the TeachEngineering website. At the top, the logo reads "TEACH Engineering Resources for K-12". Below the logo is a navigation bar with links for "Browse", "Search", "Get Involved", "K-12 Engineering", "About Us", and "MyTE". The main content area includes a "Home" link, a "Welcome to TeachEngineering!" message, and a "Browse" section with sub-links for "Activities", "Lessons", "Curricular Units", "Subject Areas", and "Educational Standards". A search bar is present with a "Search TE" button and a link to "Advanced Search >>". An "Editor's Pick" section features a red checkmark icon and a link to "December 2011 Editor's Pick: What's Hot and What's Not?". To the right, a globe graphic is surrounded by the text "Engineers are Creative Problem Solvers" and "Help S" (partially visible), with images of children engaged in learning activities.

December 2011 Editor's Pick:
[What's Hot and What's Not?](#)

We constantly tell children: "Don't put your hand on the burner!" We tell them that it could be hot and burn them very badly. Do we tell them why it might be hot? Do we ... [more](#)

The *TeachEngineering* digital library provides teacher-tested, standards-based engineering content for K-12 teachers to use in science and math classrooms. Engineering lessons connect real-world experiences with curricular content already taught in K-12 classrooms. Mapped to educational content standards, *TeachEngineering's* comprehensive curricula are hands-on, inexpensive, and relevant to children's daily lives.

Welcome!

Welcome to the Rhode Island Commission on Women web site. Thanks for visiting!

Recent Projects:

2010 Women of the Year Event!

On October 6, 2010, the Rhode Island Commission on Women (RICW) will hold its annual Woman of the Year event at the Crowne Plaza Hotel to honor **Lynette Labinger, Esquire, Anne M. Nolan, and Donna M. Sams** for their outstanding contributions to Rhode Island women. Additionally, **Sister Mary Reilly, RSM** will receive the RICW Lifetime Achievement Award. Hosted by Karen Adams of WPRI-12, be sure not to miss this event!

Tickets are \$50 each. To purchase click [HERE](#)

Sponsors

These generous sponsors honored the 2010 Women of the Year recipients by making donations to the RICW Project, a non-profit corporation that supports the mission and projects of the Rhode Island Commission on Women. Donations support such projects as the the Freda H. Goldman Education Award.

The Goldman Award provides opportunities for women to continue their education endeavors by assisting with expenditures not normally covered by traditional educational scholarships such as child care, clothing, supplies and other related expenses.
