Chapter 12 Imposition and Layout

ACTIVITY

Lay out a dummy for the Homecoming Program. (files located in Public folder named “Imposition”) Put all information on the dummy for every page needed in the program.

Label all parts of the dummy as described on page 254 in your Graphic Communications Book.

What size paper will you need to create an 8 page signature?

What imposition type will be needed for printing your program?

How many signatures will you need?

After creating your dummy, design the Homecoming program on your computer using InDesign. Your final layout should be set up to print as 8 page signatures.

After your Homecoming program is completed, you must package your files, creating a Job Ticket in InDesign. This must specify printing, folding, binding and cutting instructions for your job.

You must also create a PDF with Job Ticket instructions.
