COURSE INTRODUCTION:

Career Development

The units in career development are designed to assist students in developing the knowledge and skills to make sound decisions about their educational and career goals. Recognizing the career development is a life-long process, these units build around the concepts of career awareness in the elementary grades, career exploration at the middle school level, and planning and decision making at the high school level. The ultimate outcome is that all students will develop and maintain a rigorous and relevant personal plan of study that will guide them into a successful post-secondary transition. The three major areas covered are:

Applying career exploration and planning skills in the achievement of life career goals.

Major Points: This area includes individual planning skills as vital learning for K-12 students. Career exploration and planning skills are developmental in nature and build upon each of the other standards. Career exploration emphasizes the dignity and necessity of all work and workers; the role of preferences and skills in job satisfaction and the concept of a "balanced life." Included in this Standard will be the interrelationship of all parts of one's life (e.g. family, community, work, and personal interests) across the life span. The concept of life career planning emphasizes the integration of knowledge and understanding of skills required in the world of work and daily living.

Knowing where and how to obtain information about the world of work and post-secondary training/education.

Major Points: This area is intended to help K-12 students know how to seek information that is credible, age-appropriate, and unbiased. Students will be provided with systematic and sequential opportunities to learn about and understand the level of preparation required for various occupations (e.g., apprenticeships, career and technical education, 4-year/2-year college or university, and the military). Knowledge, skill and understanding will include the kinds of career information resources available (e.g., print/electronic/personal interviews) and how to access the information independently. The purpose is to add to the individual's ability to be an advocate for self.

Applying skills for career readiness and success.

2013

Major Points: Employment readiness is considered to be developmental in nature and includes helping K-12 students develop individual skills of: responsibility taking, dependability, punctuality, integrity, self-management and effort. In addition, employment readiness skills include appreciation and respect for other's differences and the ability to work effectively as a team member to accomplish the goals of the organization. These are the skills that contribute to work performance and add value to one's contribution in the classroom and in the workplace.

2013

UNIT DESCRIPTION: Career Investigations: Jobs in t	SUGGESTED U	SUGGESTED UNIT TIMELINE: 3 Lessons				
In third grade, students will be gaining additional in work and workers through actual interviews with ad assume the roles of Investigative Reporters and will people at work.	CLASS PERIOD (min.): 30 minutes each					
ESSENTIAL QUESTIONS:						
 Why does our world need different types of j Why do people need jobs? ESSENTIAL MEASURABLE LEARNING 	CCSS LEARNING GOALS		CROS	SWALK TO S	TANDARDS
