Area/Volume

Rectangular Concrete Pad #2

I have planned a new hog fence. I have prepped a site measuring 14' X 32'.

1.	I will pour a 3 inch slab over this area. How many cubic feet of concrete will I need?
2.	Allowing an extra 10% for waste, how many cubic yards of concrete will I need?
3.	Concrete this winter will cost me \$107.70 per cubic yard . How much should be budgeted for concrete?
