

Evaluation

Correctly match the appropriate plant process with the description of that process.

- | | | |
|---|---|---------------------|
| C | 1. The process through which water containing dissolved minerals enters the plant's hair roots | a. Photosynthesis |
| | | b. Respiration |
| D | 2. The movement of water and organic materials within the plant | c. Water absorption |
| | | d. Translocation |
| A | 3. The process through which green plants convert carbon dioxide and water in the presence of light into simple sugar (food) | e. Transpiration |
| B | 4. The breakdown of glucose, releasing energy for plant growth, and other metabolic processes or chemical reactions occurring within the cell | |
| E | 5. The loss of water by evaporation primarily from the leaf surface | |

Circle the letter that corresponds to the best answer.

6. In the process of manufacturing food, plants require water, light energy, and
- a. Oxygen
 - b. Glucose
 - c. Carbon dioxide
 - d. Energy

Correct answer is c.

7. Respiration produces carbon dioxide, water, and
- a. Oxygen
 - b. Glucose
 - c. Carbon dioxide
 - d. Energy

Correct answer is d.

8. Plants contribute to air quality because they
- a. Provide a source of carbohydrates to humans
 - b. Use light energy to produce food
 - c. Produce oxygen as a by-product
 - d. Have chlorophyll in their cells

Correct answer is c.
