

Computer Information Systems Accessibility Assignment

You need to research on the internet how to design for accessibility issues. You will be asked to create systems for users that could be blind, color blind, hearing impaired, or other disabilities. As a developer, you need to know how to develop applications for those situations. After you complete the research, you should write a short (1-2 pages) paper on how to develop applications for accessibility. You should cite the sources that you used and use proper format. Spelling and grammar do count in this assignment. After you have completed the paper, fill out this form and turn only this form in. Do not print out your paper.

Name : _____

Title of Research Paper: _____

Where can the paper be found? _____

Scoring Guide
