

Lesson 6: Herd Management

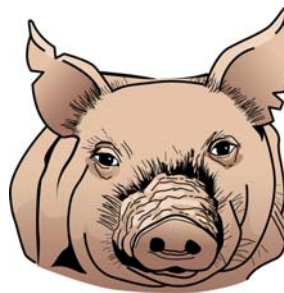

Name _____

Ear Notching

Objective: Determine the litter number and pig number using the universal ear notching system.

In the standard ear notching system, the litter number (right ear) is read first, followed by the pig number (left ear). Determine the notch number by adding the notches in the same ear together using the key above. For example, the following pig is identified as litter #12, pig #2.

Identify the litter number and pig number for each pig illustrated.

1. _____

2. _____

3. _____

4. _____

5. _____

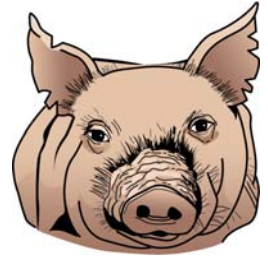

6. _____

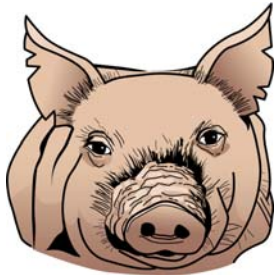

7. _____

8. _____

9. _____

10. _____
